

2.0 Village character

2.1 Evolution of the Village

Kidlington has a long history of habitation dating back to the Anglo Saxons and beyond. It is recorded in the 1086 Domesday Book as 'Chedelintone'. From its origins as a small rural settlement close to the River Cherwell it grew gradually over many centuries, its shape and form changing in response to new roads, canals and the availability of land. It was not until the mid 20th century that Kidlington began to grow at a much greater pace due to rapid housing development.

2.1.1 Kidlington-on-the-Green

The medieval settlement of Kidlington was a series of dispersed hamlets, the largest of which grew around the Church of St Mary the Virgin (built 1220), the Mill and Manor House, located immediately to the west of the River Cherwell on today's Church Street. At the junction of today's High Street and Mill Street was the Town Green and during the 17th and 18th centuries, substantial properties were built around it on today's School Road, Mill Street and The Moors. The Town Green was built on during the 19th and 20th centuries but its original extent is marked by the remaining historic properties which now front onto later residential development.

The village was bounded to the south-west by a second green known as 'Kidlington Green' – a large area of unenclosed common land, which appeared in an early-modern suffix to the village's name ('Kidlington on the Green') and was celebrated in a minor English folk song.

Figure 2.1 Kidlington on the Green was celebrated as an English folk song

2.1.2 Growth to the west

The Enclosure Act of 1818 privatised the common land south of the High Street and led to the expansion of residential dwellings along the High Street. Passing trade generated by the Oxford to Banbury Road encouraged growth of commercial premises including a number of public houses at the junction with the High Street.

The Oxford Canal running to the west of Kidlington opened in the 1790s followed in the 1850s by the railway and its station located at Station Approach (closed in 1964) which linked Kidlington to Oxford, Banbury and the Midlands. These new connections brought employment and growth of residential properties northwards along Oxford Road. The railway and canal continue to form two linear barriers which have come to define the western edge of the village. By 1901 the village had a population of around 1,000.

2.1.3 Early 20th century ribbon development

During the first half of the 20th century the village began to spread out with 1930s ribbon development of semi-detached properties along Oxford Road and Bicester Road. To the south a 'Garden City' development commenced, which initially formed an isolated residential area separated from the rest of the village by an enclosed area of the old Green which remained as farmland.

To the north of the High Street, The Moors was developed, characterised by detached properties and bungalows on large plots set back from the road.

In 1931 Kidlington became the location of the Oxford Zoological Garden (in the area now occupied by Gosford Hill School) which hosted animals including an elephant, lions and flamingos. The attraction was short-lived and closed in 1937 when it was relocated to Dudley Castle. Other attractions included the Sterling Cinema on the High Street (now Tesco superstore).

In 1932 Kidlington Church of England Central School opened (later to become Gosford Hill School) to provide schooling for secondary age pupils. In 1935 Oxford City Council bought land at Campsfield to the north-west of Kidlington for the Oxford Municipal Aerodrome, becoming RAF Kidlington during the second world war.

2.1.4 20th century rapid growth

Following the war, Kidlington experienced rapid expansion, increasingly functioning as a dormitory village to Oxford. The large residential estates which were created are typical of their time, consisting predominantly of inward facing, cul-de-sac based layouts, with little reference to village character, vernacular detailing or materials.

Despite the closure of the railway station in 1964, employment growth continued with the development of business parks and a motor park to the north of Kidlington adjacent to London Oxford Airport. The airport itself was privatised in the 1980s and became a centre for aviation training, business aviation and subsequently, charter flights. Population growth was matched by the expansion of Village Centre retail and services to the west of Oxford Road including construction of The Kidlington Centre shopping mall, and new primary schools (bringing the total to four) and community facilities at Exeter Close.

2.1.5 Late 20th and early 21st Century

In recent years housing development has been of a small scale (restricted by the Green Belt which surrounds the village), for example, the estate expansion adjacent to the canal at Croxford Gardens and a 36 home rural exception site for affordable housing at Bramley Close, off Bicester Road. Employment uses have grown to the south of the airport and at Begbroke, where Oxford University purchased the site to establish a research facility in 1998.

The High Street has been partially pedestrianised and new retail and office development has taken place at the High Street / Oxford Road junction and on the High Street's southern side. To the south of the village, Stratfield Brake opened in 1999 providing 20 acres of sports facilities for a range of local clubs.

The Green for which Kidlington was once famous has been lost, but the majority of historic properties remain in pockets, protected by Listed Building designation and conservation area status. In 2011, the built up area of Kidlington (including Gosford) had a population of 15,046. It lays claim to being the second largest village in England, governed by a Parish rather than Town Council and retains a physical separation from the adjacent communities of Begbroke, Yarnton and Oxford to the South.

2.2 Historic assets

A conservation area is defined as ‘an area of special architectural or historic interest, the character or appearance of which it is desirable to preserve or enhance’ (Listed Buildings and Conservation Areas Act, 1990).

Kidlington contains six conservation areas; Church Street (the historic core), High Street, Crown Road, The Rookery, Langford Lane Wharf and the length of Oxford Canal.

The majority of statutorily listed buildings are situated within the Church Street and High Street conservation areas to the north-east of the Village Centre and include St Mary’s church (the village’s only Grade I listed structure), The Old Priests House, Manor Farmhouse, Dovecote, The Old Vicarage and Mill House. Kidlington’s Historic Village Trail described in leaflet form, takes in fifteen of the areas important buildings in the Church Street and Mill Street area. Buildings materials reflect local geology with limestone walls giving a distinctive character and roofs of clay tile, slate and thatch.

The listed buildings have been identified and protected by the Secretary of State with the guidance of English Heritage, for their special historic or architectural interest.

In addition, there are a number of locally listed structures which are recognised by the Council as historically important and worthy of retention. These buildings of local interest are not graded or protected by law unless they are situated within a conservation area. Conservation area appraisals for all areas have been produced by the Council.

2.3 Topography and geology

The majority of Kidlington is underlain by Oxford Clays of the Kellaways Formation, which to the east and west of the village is overlain by Alluvium. To the north (including London Oxford Airport) the bedrock is the Great Oolite group of limestones, with superficial river terrace deposits of sand and gravel.

Much of the village is relatively flat and low lying (around 60–65m AOD) except for a central ridge of higher land running north-south to the east of the Banbury to Oxford Road. The land gently falls to the floodplain of the River Cherwell to the east and towards the Rowel and Kingsbridge Brooks (now the route of the canal) to the south west.

Higher land to the north-east forms rolling farmland with a ridge linking Thrupp to St Mary's Church across Kidlington Fields which provides views of St Mary's Church spire and the surrounding countryside. To the west and north-west the land rises more steeply towards Begbroke, the airport and the hills beyond.

Figure 2.9 Topography

2.4 Character and setting

2.4.1 First impressions and hidden gems

Today, to a driver passing through the village on the Oxford Road, the first impression of Kidlington is of a primarily suburban linear settlement of 1930s semi-detached dwellings, leading into large modern housing estates. The character of the village is affected by it being a main route for travelling between Oxford and Banbury. Kidlington's distinctive and historic townscapes and landscapes including the remnants of the historic village around St Mary's Church, the canal and wetlands are located at the edges of the village and unfortunately not apparent to many visitors.

The Pevsner architectural guide emphasises the poor first impression created by 2-3 mile stretch of ribbon development along Oxford Road and Banbury Road. One of the purposes of the Framework is to identify ways of revealing Kidlington's identity and improving the quality of the built environment.

2.4.2 Townscape and landscape character areas

The physical character of Kidlington and its landscape setting has been classified into thirteen distinctive character areas (Figure 2.10).

Townscape

- 1** Village centre
- 2** Historic village
- 3** Ribbon development

Residential estates

- 4a** Late 20th century cul-de-sac estates
- 4b** Garden City and mid 20th century housing
- 4c** Gosford

- 4d** The Moors
- 5** Business Park
- 6** London Oxford Airport

Landscape

- 7** Oxford Canal
- 8** Kidlington fields and River Cherwell
- 9** Stratfield Brake and surrounds
- 10** Western Gap

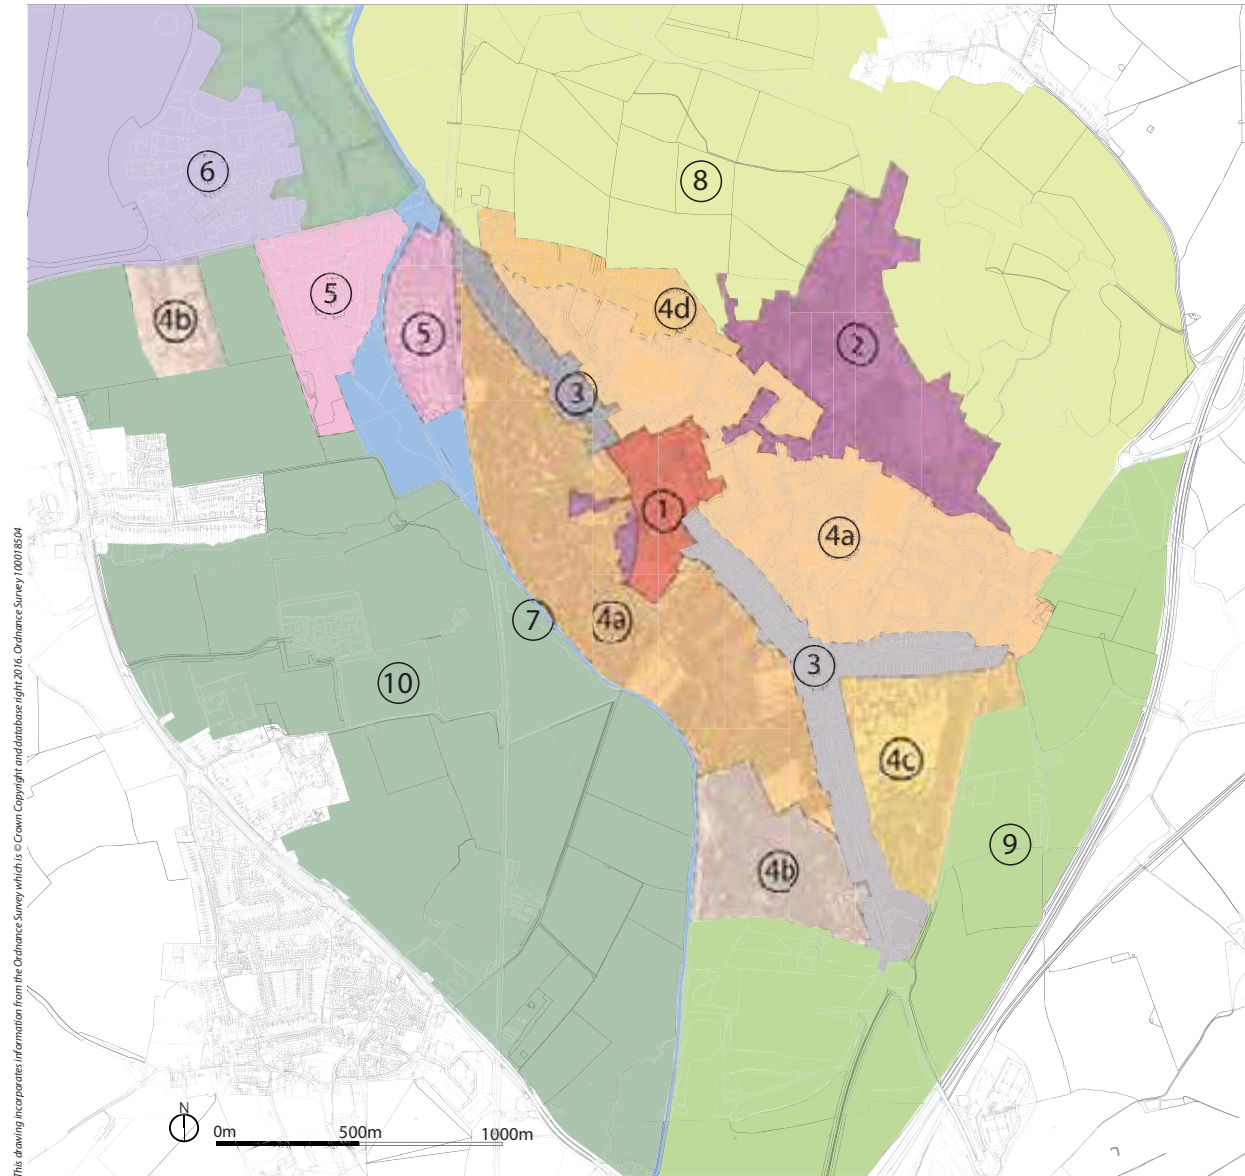

Figure 2.10 Character areas

1 Village centre

Located at the geographic centre of the village, the partially pedestrianised High Street to the east of Oxford Road is the focus for retail and services, while nearby Exeter Close provides a cluster of community facilities. Much of the architecture of the centre is recent and ranges considerably in character, height, scale, materials and quality. The result is a fragmented townscape which relates poorly to the remaining historic properties fronting Oxford Road to the north of the junction with the High Street. A detailed analysis of the Village Centre is provided in chapter 4.

2 Historic village

This area contains the historic core of the village, which grew around St Mary's Church, the Town Green and the Mill. It is designated the Church Street conservation area and retains the character of a quintessential Oxfordshire Village with fluctuating street widths, winding lanes, limestone houses and cottages (many of which are listed) and stone walls. Non-residential uses include the historic Six Bells public house and a small row of shops.

The church spire is a landmark particularly from views across the Cherwell Valley, and marks the eastern edge of the village and start of the footpaths along the River Cherwell.

A nature reserve known as St Mary's Fields sits within the Conservation Area boundary. This wild area contains a rich variety of indigenous shrub and tree species providing ideal habitats for bird species such as warblers, tits and thrushes. Wet meadow plants are typical for this area including bee orchid, meadowsweet and angelica. Wildlife includes roe deer, muntjacs, grass snakes and foxes. A full description of the conservation area is available in the Kidlington Conservation Area Appraisal, Cherwell District Council, 2009.

The character area also contains two discrete pockets of similar character: Crown Road and The Rookery conservation areas.

3 Ribbon development

The main through roads, Oxford to Banbury Road and Bicester Road, are characterised by the ribbon development of predominantly semi-detached dwellings dating from the 1930s with large front gardens and service roads to accommodate the car. The short cottage terraces, on the northern section of Banbury Road (opposite Lyne Road) have a modest, arts and crafts architectural style with front hedges to the street. The residential frontage is interrupted by small local retail centres at the Broadway and at the Bicester / Oxford Road junction and occasional public houses and community facilities. There are wide green verges and street trees on the southern section of the Oxford Road which gives a boulevard character but overall the corridor feels dominated by traffic.

4. Residential estates

Kidlington's residential neighbourhoods consist predominantly of estates built in the 20th century.

4a Late 20th century cul-de-sac estates

The large areas of inward facing housing estates built from the 1960s onwards have poor connectivity due to their cul-de-sac, or curving street layouts which prioritise movement by car. The car is often dominant within the streetscape and estate loop roads are fronted by back fences. Homes are generally 2 storey and range from small detached, semi-detached and short runs of terrace, of brick construction with pitched roofs. The layouts result in small 'leftover' green spaces which have limited function and narrow rear footpaths. Several of the estates have larger recreation areas located behind the houses which are bounded by the rear fences of properties and lack surveillance.

4b Garden City and mid 20th century housing

Homes towards the south of the village in the area known as the 'Garden City' are laid out in the curved street pattern typical of 1950s Garden Suburb developments. They consist of plain red-brick semi-detached properties of two storeys. There are intermittent street trees and boundary treatments vary. Some properties have attractive front gardens and hedges, but most have been paved over for parking. The estate is accessed from Oxford Road at The Broadway which is the location of local shops and St John the Baptist Hall Church which also dates from the 1950s.

4c Gosford

Residential streets surround a cluster of community facilities including Edward Feild Primary and Nursery Schools, Gosford Hill Secondary School, a medical centre, Kidlington and Gosford Leisure Centre, and Thames Valley Police Headquarters. A large enclosed recreation field is used by the schools and leisure centre.

Homes date from the 1950s to 1980s and include detached and semi-detached properties in a range of styles, with a high proportion of bungalows on streets to the south of the Thames Valley Police Headquarters (e.g. Hampden Drive).

Figure 2.18 Garden city tree lined streets and green public spaces

Figure 2.19 Garden city semi-detached housing

Figure 2.20 Gosford - leisure centre

Figure 2.21 The Moors- detached homes

4d The Moors

The Moors is an attractive leafy street with grass verges and large, hedged front gardens to properties. Detached, semi-detached homes and bungalows in a range of architectural styles occupy large plots with long back gardens. These back onto Kidlington Fields to the north, creating a soft edge to the village. As one of only a handful of through roads in the village, The Moors experiences rat-running and speed humps have been added to provide traffic calming. A number of small cul-de-sac estates have been built off The Moors in the late 20th century.

5 Business Park

Office and light industrial uses are concentrated to the north-west of Kidlington, south of Langford Lane. There are eight separate business clusters, operating independently of one another and with limited connectivity.

The employment clusters are generally in good condition (building, condition, environment and access) with the exception of Cherwell Business Park which is identified as being in poor or very poor condition in the Employment Land Study 2012. Langford Locks industrial development to the west of Oxford Canal is a mix of industrial 1-3 storey buildings situated within large areas of surface car parking. A number of these business sites, particularly along the canal edge, have informal boundary treatments of wire fences and vegetation. Oxford Motor Park incorporates showrooms including brands of Honda, Nissan and Toyota. The Cherwell Employment Land Study (2012) identifies London Oxford Airport and Field of Langford Lane as employment clusters containing undeveloped sites.

6 London Oxford Airport

To the north of Langford Lane is the airfield and buildings of London Oxford Airport, and the adjacent office park which is the home to Elsevier publishing and Thames Valley Police offices. The airport focuses on private and charter flights, maintenance support and professional pilot training.

Grovelands Estate (4a)

Grovelands Estate

Figure 2.23 Business Park situated off Langford Lane

Figure 2.24 London Oxford Airport

Figure 2.25 Oxford Canal- Views along Oxford canal

7 Oxford Canal

The Oxford Canal forms a green western boundary to Kidlington that can be explored along the formal towpath on its western side. The waterway provides habitat for an abundance of wildlife such as swans, mallards and water voles. Situated north of Roundham Lock is a Site of Special Scientific Interest known as Rushy Meadows, a wet meadow which is very rich botanically with a wide variety of rare plant species.

The canal has greater activity in the north with Roundham Lock and bridge, canal boat moorings and pretty towpath gardens, cottages and a pub garden overlooking the canal. Further south there is poor connectivity between the canal and the residential streets to the east. Properties back onto the canal edge with high garden fences and dense vegetation limiting access and views.

8 Kidlington Fields

The River Cherwell meanders south from Thrupp and to the east of Kidlington, surrounded by a water meadow landscape with overhanging willows along the bank edge attracting herons and kingfishers. Within these meadows is an overgrown reed area attracting a wide range of bird species including warblers, bitterns and woodcocks. Between the River Cherwell and the north edge of the village are broad rolling fields which rise in height to the north west, these are known as Kidlington Fields. Footpaths across the fields provide links to Thrupp and Hampton Poyle. Views towards St Marys Church are particularly distinctive.

9 Stratfield Brake and surrounds

The focus of this area is the sports facilities at Stratfield Brake consisting of large playing fields and supporting facilities. To the north, Stratfield Farm has finely divided fields, bordered by thick hawthorn hedges. South of the sports ground is an area of public oak and ash woodland also known as Stratfield Brake, managed by The Woodland Trust. It provides a habitat for a variety of wildlife species including rooks, titmice and buzzards. The land between the woodland and the canal is a wetland area with lakes, shallows and islands creating an ideal habitat for dragonflies, little egrets and sandpipers. Access to the canal is via a new footbridge.

10 Western Gap

The landscape to the west of the canal is divided into large open fields surrounding Begbroke Science Park which is screened by mature vegetation. These fields have substantial hedges with mature trees and provide a green gap between Kidlington, Yarnton and Begbroke.

2.5 Views and setting

2.5.1 Village edges

Kidlington is an 'inset' village within Oxford's Green Belt which tightly encircles the built up area. The protection of the Green Belt has prevented coalescence of settlements and preserved the integrity of the village and ensured the retention of Kidlington's landscape setting.

The western edge of the village is strongly defined by the canal. Development has not extended beyond the canal and the area is liable to flooding. To the west, the railway forms a further barrier, separating Kidlington from Yarnton. Yarnton Road / Sandy Lane is the only vehicle route crossing the canal and railway, the latter by an at grade level crossing.

In contrast, the village's eastern edge is softer, with back gardens abutting fields which lead down towards the River Cherwell. St Mary's Church at the eastern end of Church Street marks the eastern end of the village and the start of the footpath network across Kidlington Fields towards the River Cherwell. Views towards the distinctive church spire from the surrounding valley landscape and from Hampton Poyle are particularly characteristic of this area.

To the south east, the boundary of the village is defined by Bicester Road. This long, straight, road has no development frontage and is characterised by a wooded hedge to the south and an avenue of mature poplar trees to the north, hiding the back fences of adjacent homes. There are no streets or footpath connections for around 1km, making this an impenetrable edge.

2.5.2 Approaches

Kidlington roundabout forms the 'gateway' to the village from the south and provides access to Oxford Road which is fronted by homes and a large Sainsbury's. Stratfield Brake sports grounds (hidden from views by vegetation) and Oxford Parkway station / Water Eaton park & ride are located within the otherwise open landscape to the south.

The approach to the village from the north on the A4260 is more gradual, starting with glimpses of the canal, the Langford Lane turn-off and Highwayman Hotel before the road travels over the rail bridge and enters the main settlement.

From the A44 to the north-west the approach is via Langford Lane past the London Oxford Airport, Campsfield House and business estates.

Approaching Bicester Road from the east, the gateway to the village is marked by the Harvester pub, which fronts the junction with Water Eaton Lane.

Figure 2.32 High Street clock tower

Figure 2.33 Aircraft on view from Langford Lane

2.5.3 Key views and landmarks

The village has few notable landmarks which have an impact beyond their immediate setting:

- The spire of St Mary's is visible from all directions across St Marys and Kidlington fields and from Hampton Poyle. It is the village's most distinctive and identifiable landmark.
- Within the Village Centre, the most prominent building is the square clock tower which sits at the Oxford Road / High Street and is a visible landmark from Oxford Road to the south.
- The aircraft are visible at London Oxford Airport from Langford Lane.
- Long distance views within much of the village are restricted as a result of the cul-de-sac / curving layouts of many of the residential estates, which make orientation and legibility difficult. Where estates back onto the canal's eastern edge the overgrown vegetation and buildings prevent clear views of the water. There are small pockets of green space where the canal can be viewed.

Longer distance views are available in the following locations:

- At the northern gateway to the village, the canal towpath widens and the vegetation is less dense allowing longer views down the canal and across the countryside, and to the canal from Banbury Road.
- The footpath running across the ridge of higher land at Kidlington Fields offers wide ranging views across open countryside and a direct view of the church spire.
- From the western towpath of the canal there are curving, enclosed views along the canal itself and filtered short distance views into adjacent fields to the west. Begbroke Science Park is visible from footpaths heading west due to its elevated position, but is partially screened by field boundary planting.
- Along the straight sections of Oxford Road, Bicester Road and Yarnton Lane.
